MEMORANDUM FOR THE RECORD

SUBJECT: Meeting with Security Personnel

1. On the afternoon of 25 September at 1530 hours, a meeting was held between TSS personnel and personnel from the Office of Physical Security. The following personnel were in attendance:

25X1

2. The meeting was initiated by the undersigned furnishing answers to the questions forwarded in a memorandum from the Physical Security Division. These questions and answers applied to the development of the new air-fed incinerator. During this period discussions were held at some length on various subjects, such as stack requirements, etc. When the points in question were reasonably resolved among all the participants, several points of question arose that will require Physical Security Division to do further research into their own problems in order to supply us with the answers.

3. It was tentatively decided that this program would continue by having three incinerators fabricated and installed at key points in the field. These key points will be selected at a later date by the Physical Security Division. Originally the request was for twelve incinerators but  pointed out that this was not a reasonable figure since Physical Security Division was not completely sure in its own mind that this was the ultimate in its wishes for such a unit. Meanwhile, more work is going to continue at our contractor's site on points raised in a previous memorandum.

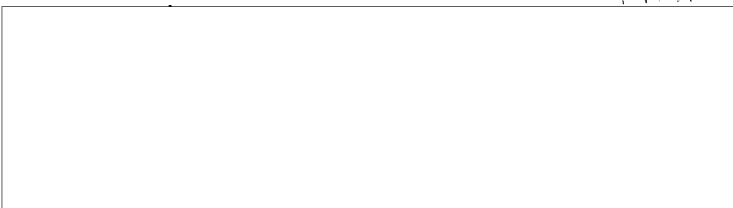

25X1

4. Another meeting has been tentatively scheduled for the afternoon of 5 October at 1330 hours when this subject will be discussed in more detail.
